ABOUT ABBACOL

The ABBACOL Foundation was founded in 2005 with the goal of primarily supporting vulnerable children in Colombia, implementing community projects with activities that contribute to education, culture, and social inclusion, thus improving their quality of life. The Foundation's mission later expanded to include victims of the armed conflict in Colombia, creating new educational projects through conferences, seminars, and workshops aimed at creating new self-sustaining businesses. This new initiative allowed the ABBACOL Foundation to project itself and promote support for social programs in Colombia, addressing the vulnerability and needs of different municipalities, groups, and communities nationwide . We work with the United Nations 2030 Sustainable Development Agenda. The NGO is accredited by the United Nations Economic and Social Council (ECOSOC) and the United Nations Convention to Combat Desertification (UNCCD).

MISSION

To train and equip the next generation through self-sustaining entrepreneurship, so they can develop in areas such as leadership, entrepreneurship, business, government, diplomacy, and more.

These trainings are provided with the support of our professionals and volunteers. At the same time, our organization has a mission focused on humanitarian and social work for Colombia's most vulnerable communities. Defending human rights as a central focus and training leaders in this new century to generate positive changes that impact society.

VISION

Our organization has a global vision, working nationally and internationally, focused on leaving a positive legacy in every area of our work. We transform lives and equip those who are part of our organization with principles and values. The creation of the "CLIDE" Center for Leadership and Business Development will be our main focus, from which we will coordinate all our social, humanitarian, and business efforts to achieve our goals as a Foundation.
